<p>(12) hex head bolts</p>	<p>(2) tools: Allen wrench & flat wrench</p>	<p>(2) hooks</p>	
		 <p>Used to hang the Check-out Chart (520941) or other items <i>All sold separately</i></p>	

Instructions

Helpful hint: DO NOT tighten the bolts all the way until the cart is fully assembled.

1) Make sure to use the left side frame first.

Slide the tab on the rod into the side frame support bracket.

2) Place one metal washer onto the hex head screw, then screw into the side frame. This will secure the rod.

3) Take the right side frame next.

Slide the other tab into the side frame support bracket.

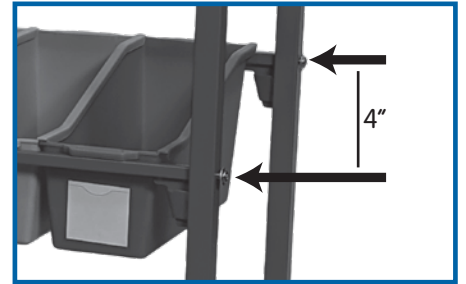

4) Place one metal washer onto the hex head screw, then screw into the side frame.

Repeat Steps 1-4 for the other rods.

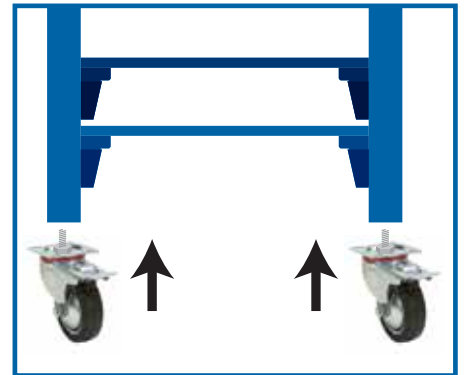

NOTE: The back rods are 4" higher than the front ones. This will allow the bins to rest evenly.

5) Using the included flat wrench, screw the wheels and casters to the bottom of the side frames.

All screws can now be fully tightened.

6) The included hooks can be used to hang the Check-out Chart (520941) or other items
