

# MathStart®

**Rabbit's Pajama Party**

**Sequencing**

**Level 1 Ages 3+**

## Activity Ideas

### Sequencing is a key concept in math as well as story comprehension.

Rabbit throws the best sleep over parties! There's pizza, hot fudge sundaes, sleeping bags, scary stories and more. Can you remember what happened first? Then next? And after that? Illustrated by Frank Remkiewicz.

**DC Standard 4.1, Number Concepts:** Children demonstrate a beginning understanding of number and operations and how they relate to one another.

- While reading the story, point out the sequence of events in the pictures. Encourage your child or students to tell the story using the words "first," "next," "then," and "last."
- Make a timeline for the story. For example, at 5:00 the friends arrive, at 6:00 they eat pizza, and so on.
- Clip out a favorite comic strip from the newspaper. Cut the comic strip into separate frames and ask your child or students to place the pieces in the right sequence.
